Astronomy 101

Join the Boise Astronomical Society in 2020 for a series of free Astronomy 101 classes. For current BAS members and amateur astronomers who would like to join the club and learn the how to of astronomy.

WHEN: 2nd Fridays of the month: 6:00pm – 6:45pm

Feb 14 “Intro & Astronomy History”

In this class we will introduce the objectives of the group of classes and learn about the practice of astronomy before telescopes.

Mar 13 “Telescopes and Binoculars: some tools of the trade”

This class will cover the various types, history, usage, and price ranges of telescopes for amateur astronomy.

April 10 “The Moon”

This month we talk in depth about observing the brightest night time object.

May 8 “Easy night objects to observe all year long/ Organizing a Session with an observing list”

The May class will cover tools to help you pick out exciting things to look at throughout the year

June 12 “Ready, Set, Observe.”

Now that you are full of knowledge it’s time to get out there.

WHERE: Anser Charter School 202 E. 42nd St. Garden City, Idaho
